BRUNEY, David; (London)Residence: UK; **Masters, Project Management**

David Bruney has over 15 years experience in delivering business benefits through effective leadership, in private and public sector organisations. He has a Masters in Project Management from the George Washington University. He is a certified Project Management Professional, a member of the Project Management Institute (PMI) and he has been employed in the capacity of Project Manager by world-class management consultancy and technology firms in Europe. His employers include Capgemini, Oracle, PeopleSoft, Cisco

Systems and Xerox Corporation. David Bruney is of Dominican heritage and was born in London, UK. He spent the first seven years of his life in Dominica. David Bruney travels frequently throughout the world, however his favourite destination is to Dominica, where he can visit family, friends, and make new business relationships. He has toured Dominica more than 10 times including the challenging hike to the Boiling Lake. He is very familiar with Dominica's nature and culture. He is a keen Mountain Biker and Scuba Diver. David Bruney is especially interested in projects which seek to develop Dominica's capacity within the information technology and ecotourism sectors.

JNO BAPTISTE, Laurelle; (Marigot), Residence: Toronto, Canada; PhD (Candidate); MA,BSc.

Tel: (416) 929-5952

Over the past four years, I have done extensive research in the area of the Digital Divide and the socio economic impact on minority groups within a North American context. I also work as a senior IT Education Consultant and understand the high level of technological expertise that is required to compete in this technologically savvy world. I have recently begun to expand my research to include developing countries like Dominica. Primarily, I firmly believe that if Dominica is going to develop further we need to attract top talent but that can only be achieved if we can develop our technological infrastructure and decrease the digital divide between developed and developing countries.

LANDER, John (Roseau); Bachelor Degree in Computer Science

Software engineer working with Bell Labs

SEVERIN, C. Sherman; (Roseau); **MBA, MS, Ph.D.**

; Tel: 206-842-4935

Has a Ph. D. and M.S. in **Material Science and Solid State Physics** from Iowa State University; MBA from Iona's Hagen School of Management, and a BS in **Physics and Mathematics** from Iona College. Serves as **CEO of Pinchot & Co.-The Intrapreneurship Company**. His expertise is in **Creating & Implementing Alternative Scenarios-Vision to Action**. He is the author of '*In the Twinkle of an Eye-Corporation Extinction & Rebirth*', a book about personal and corporate rebirth during downsizing. He is a national keynote speaker on *Corporate Strategy & Change Management, Information Technology Strategy, Generational Work Issues and Sustaining Innovation in large corporations*.

He is an experienced **business technologist**, having led projects in utility energy technologies, and the telecom, semiconductor and the software industries. He has a career that spans being a laboratory research scientist; President & CEO of a VC backed engineered materials company; Chair of Graduate Business & Management degree programs; and a Principal Management Consultant & Manager with PricewaterhouseCoopers and a consultant on strategic alliances and growth capital raising for PwC Securities. As a Principal Management Consultant with PricewaterhouseCoopers, he specialized in creating alternative scenarios in business strategies and implementations. He has worked on energy deregulation in California, construction of large utility customer information systems, new energy information technologies and spinning off a subsidiary of a large utility company. He is currently involved in new environmental technologies.

He was the **co-founder and formerly Acting VP-Business Development/CTO** at a national retail energy transaction exchange information clearinghouse. Previously, he has been **President and CEO of United Epitaxial Technologies**, an engineered materials company; **Chairman of Marylhurst University Graduate Department of Management**; **CEO of Telergy** and **President of its subsidiary, Elecon Systems**, a pioneer of internet e-commerce systems; and **Marketing & Product Development Vice-President of Softstream International, Inc**, a packaged software company. As a material scientist, he played a very significant role in developing markets for gallium arsenide technology and in rapidly expanding the Intel's 80286-microprocessor (and successors) usage due to superior yields derived from switching the building of the product unto epitaxial silicon. His strengths are in strategic alliances, corporate leadership, business & strategic market expansion, project implementation and turning visions into sustainable implementations.
